Habitat data were derived from 1:24,000 scale color-infrared photography. Preconstruction photography was obtained January 11, 1997. Classes are based on "Classification of Wetlands and Deepwater Habitats of the United States," Cowardin et al. 1979, as modified for the National Wetlands Inventory Mapping Conventions. The data were overlaid on a 1995 SPOT Satellite image at 1:35,000 scale.
