

Riverine Sand Mining/Scofield Island Restoration (BA-40) 2014 Habitat Classification

		Project Area
Project boundary	Class	(Acres)
	Bare land	16
	Beach	15
	Developed	< 1
	Estuarine emergent marsh	6
	Intertidal	46
	Mangrove	< 1
	Meadow	38
	Scrub/shrub	1
	Unvegetated dune	33
	Unvegetated flat	306
	Vegetated dune	< 1
	Water	345
	Total	806
Data Information:		
Data Information: The habitat data were obtained from 1 foot resolution digital CIR (color infrared) orthoimagery obtained April 9, 2014. The Barrier Island Comprehensive Management (BICM) program has developed a detailed 16-class habitat classification scheme. For more information see dataset metadata. The data are overlaid on 2014 CIR aerial imagery. Beneath the 2014 imagery is 2012 imagery for visual purposes only.
