 Habitat data were derived from 1:24,000 scale color-infrared photography obtained December 18, 2001. Habitat classes are based on "Classification of Wetlands and Deepwater Habitats of the United States," (Cowardin and others 1979, FWS/OBS - 79/31) as modified for the National Wetlands Inventory mapping conventions. The data were overlaid on a 1993 panchromatic SPOT satellite image.
