**Data Collection Area (DCA):** The DCA includes field samplings of water level, salinity, vegetation, surface elevation change, and soils.

**Data Information:**

The 2012 land-water data were obtained from digital imagery (Z/I Imaging digital mapping camera) with 1-meter resolution, acquired October 2012. All areas characterized by emergent vegetation, upland, wetland forest, or scrub-shrub were classified as land, while open water, aquatic beds, and mudflats were classified as water.

**Prepared by:**

U.S. Department of the Interior

U.S. Geological Survey

National Wetlands Research Center

Lafayette, Louisiana
